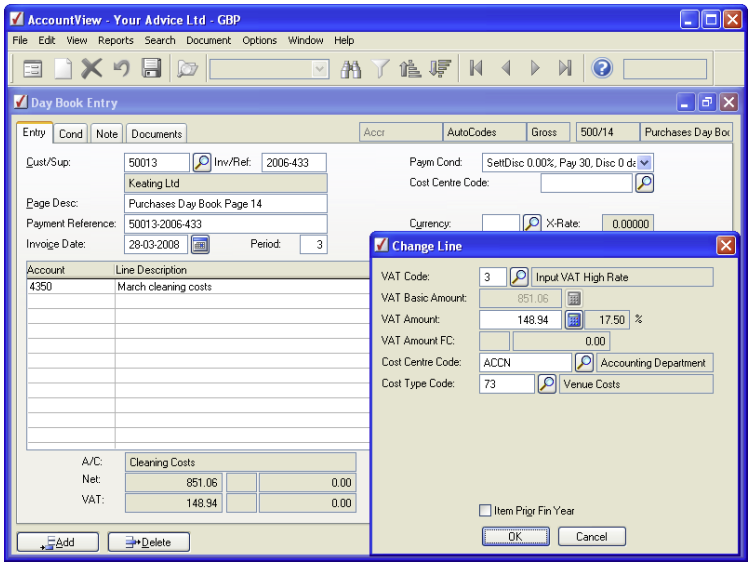
EXTENDED COST ANALYSIS

FOR WHOM?
For everyone who wants to have greater insight into his expenses and the ability to analyse them thoroughly.

Do you need more than the standard cost centres and cost reports available in AccountView? If so, additional dimensions are available with the *Extended Cost Analysis* module.



The *Extended Cost Analysis* module gives you the possibility to differentiate costs by cost centres and cost types. For example, you can enter cleaning costs under the heading of "Venue Costs" and then make a secondary allocation to the accounts department. In this way, you can view and analyse your costs from a variety of angles.

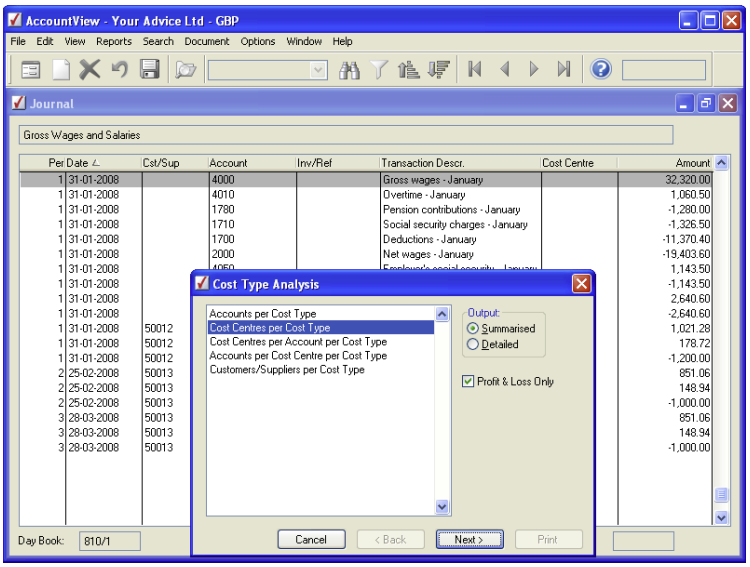
CUSTOMISED ALLOCATION

Allocate your expenses and revenues as you see fit to various categories, based on cost types, and independently of departments or products. For example, you can divide your costs by target group or branch if your departments are distributed over several branches.

COMPREHENSIVE COST SPECIFICATION

View and analyse cost centres from a variety of angles with the possibility to specify costs by department, business unit, product or commodity.

EXTENDED COST ANALYSIS



The *Extended Cost Analysis* module offers you extensive reporting facilities for flexible and penetrating insight into your costs. This allows you to view your costs from any angle you wish and helps you keep control over your hidden costs.

COST TYPE LINKED TO ACCOUNT

Select a default cost type per nominal ledger account, thereby considerably speeding up the entry process.

ADVANTAGES

- More insight into the possibilities for cost reduction and improving efficiency.
- Extensive reporting facilities for optimum clarity.
