

## BUSINESSALERTER I

Would you like to be informed automatically about the state of affairs within your organisation? With alerts from the *BusinessAlerter I* module, it is easy to keep an eye on your business processes.

### FOR WHOM?

For everyone who wants to actively make use of automatic notification and reporting to direct his organisation more efficiently.

### ADVANTAGES

- Create your own alerts to get tasks and processes performed automatically.
- Draw up and send reports automatically, periodically and using the same settings.
- Easy maintenance of alerts because you can simply transfer them from one company to another.
- Flexible use of alerts – you can activate them for a specific company, all companies or your entire system.

Would you like AccountView to make a backup automatically every month? With the *BusinessAlerter I* module, you just activate an alert and AccountView will create the backup for you every month. You don't need to do anything else!

### MONITORING

You can have AccountView compose reports automatically, periodically and using the same settings and send them to the same people. This allows you to monitor your business processes, so that you can always react promptly to developments inside and outside your organisation.

### CREATING ALERTS

Create alerts to get tasks and processes performed automatically. For example,

you can create an alert to retrieve the 'Balance Sheet' report and save it as a PDF file.

### FLEXIBLE PLANNING

Set up alerts to be executed in line with a specific schedule. For example, you can schedule it so that you receive the financial figures for your monthly meetings by email every alternate Monday in the month. You can also save your reports to a fixed file location in your network.
