

## SUBSCRIPTIONS

Would you like to see the processing of your recurring invoices handled efficiently? If so, you can rely on the *Subscriptions* module.

### FOR WHOM?

For everyone who handles a lot of recurring invoices and wishes to streamline the processing of these.

With the *Subscriptions* module, you can define the general attributes of your subscriptions, such as their renewal term, cancellation notice period and invoice interval.

\* Extension of the *Sales Order Processing I* module.

### SUBSCRIPTION GROUPS

In a Subscription Group, you can define the general attributes of your subscriptions, such as their renewal term, cancellation notice period and invoice interval. You can then link each subscription to a Subscription Group to make these general attributes available to the relevant subscription.

### AUTOMATIC INVOICING

Automate the invoicing of your subscriptions. For example, you can make and send invoices at preset times by defining

the invoice interval and invoice dates for each Subscription Group.

### PRICE CHANGES

Because the price of a subscription is determined by the products that are linked to it, you can change the price of all your subscriptions in one go. This means that if you change the prices in your product file, your subscriptions will automatically be allocated the correct price.

### CLEARLY LAID OUT REPORTS

Retrieve the 'Subscriptions to be Invoiced'

## SUBSCRIPTIONS

The *Subscriptions* module gives you a clear and comprehensive window showing all the periodically generated invoices based on your subscriptions. You can also find the generated sales order/sales invoice numbers in this window. When you have processed these sales orders, AccountView automatically shows the associated invoice numbers in the window.

report to see which subscriptions you can invoice. If you want to invoice the subscriptions relating to a specific salesperson or a special group of customers, you can also define a filter.

### RENEWING SUBSCRIPTIONS

Automatically renew your ongoing subscriptions by configuring this setting for each subscription group. On the other hand, you can also use the facility to renew your subscriptions manually.

### TERMINATING SUBSCRIPTIONS

Define a notice period and let AccountView automatically suggest a termination date for your subscriptions, or use the facility to manually enter your own, definite termination date.

### ADVANTAGES

- Generate recurring invoices based on previously created invoices to ensure a fast and error-free invoicing procedure.
- You have a constant overview of the status of all periodically generated invoices, based on your subscriptions.
- Change and adjust subscription prices quickly and easily.
- Extend or terminate subscriptions with flexibility.
