## WAREHOUSE LOCATIONS

Do you have a number of magazines with dozens of racks, thousands of items and various warehouse staff? Do you find you lose track of it all? If so, you can rely on the *Warehouse Locations* module.

With the *Warehouse Locations* module, you not only see how much stock you have when entering sales orders, but also the exact location in your warehouse where the stock is kept. This gives you all the information you need, all at one go, to quickly and efficiently process your sales orders.

✓ BUSINESS

FOR WHOM?
For everyone who wants to know exactly where stocks are located.

✳ Extension of the *Stock Control* module.

NO MORE SEARCHING IN VAIN
Save yourself a lot of fruitless searching. Record warehouse bin numbers imme-diately when entering your purchase and sales orders, and even when retrieving products from backorder or entering receipts. Then you know exactly where to find things.

EXTENSIVE REPORTS AND SEARCH WINDOWS
Take advantage of the extensive reporting facilities and search windows. For example, when working in the Products window you can quickly find out in which ware-houses and bins a certain product is stored. When working in the Warehouse Locations window, you can view the product transactions for a specific bin number. What is more, you can print an inventory report with a single action when working in the Warehouse Locations window.

WAREHOUSE LOCATIONS

Do you want to compare the stock in the warehouse with your company data? The *Warehouse Locations* module offers you inventory lists per warehouse bin to enable you to form an inventory of your stock What is more, it is really easy to check your stocks as AccountView has a separate column reserved for this purpose.

ADVANTAGES

■ Professional control of your warehouse locations – the module supports over 60 million warehouses, each with over 60 million possible warehouse bin numbers.

■ Convenient functionality, such as copying warehouse bin numbers and coding of warehouses and warehouse bins at five levels.

■ Complete insight into your stocks in your various warehouses, because you can drill down to those without restriction.

■ Seamless integration of input of warehouse locations in all product entry windows, including Sales Order, Purchase Order, Stock Page, Products in Backorder, Receipts and Production Order.

LIGHTING FAST INPUT
Speed up your data input. You can rely on AccountView to automatically allocate warehouse locations, based on settings, setup data, priorities and stock quantities. It is just as easy to make changes.

COMPLETE INSIGHT
Drill down to get a complete overview of your stocks in the various warehouses. For example, you can view the free stock per warehouse bin per product, stock quantities per warehouse bin per product, product transactions per warehouse bin, product line data per product transaction per warehouse bin and inter-warehouse transfers per product.
