

BUSINESSREPORTER TRADE

Would you like to have your own company-specific reports in AccountView? If so, you can use the powerful *BusinessReporter Trade* module to create professional user reports.

FOR WHOM?

For everyone who wants to get more information out of their accounting system than just the standard reports.

Have you used the *BusinessModeller* and *BusinessDimensions* modules to make additions to AccountView for use with your branch administration system? If so, you can use the *BusinessReporter Trade* module to create additional reports for these.

* Logical extension of the *BusinessModeller Trade* and *BusinessDimensions Trade* modules.

CUSTOMISED REPORTS

Compose reports in any AccountView window, containing the exact information that you require. For example, create additional reports about your subledgers or put together an integrated report containing data from AccountView and data from your industry-specific solution.

HANDY WIZARD

Make use of the handy wizard to compose your own user reports. You can also use

this wizard when designing to view the draft result and make immediate adjustments.

PERFECT ORDER

You can keep your user reports in perfect order in a separate window so they cannot be changed with authorisation. In this window you can also activate the wizard again to make any desired changes.

BUSINESSREPORTER TRADE

With the *BusinessReporter Trade* module, you can compose any report you wish. You do not need any knowledge of programming or of the database to do this. For example, you can easily compose a clearly laid out report showing the revenue per branch per product group, revenue per product per branch, or a comparison of actual and target revenues.

FOR EXPORT FILES TOO

Create export files quickly and at a single stroke by defining a complete export definition to your own specifications. When you have done this, just select this definition from the menu to execute the export. This is convenient if you want to add up-to-date data to your industry-specific solution or update your website.

DIRECT LINK TO EXCEL

Transfer report data directly to Excel, linking it immediately with macros to produce professional reports and analyses quickly. In this way, you can benefit from Excel's excellent reporting and analysis facilities.

ADVANTAGES

- Optimum ease of use, because you do not need any knowledge of programming or the database, and reports automatically get the 'look and feel' of AccountView reports.

- Flexible layout options, including portrait or landscape format and letter font, style and size.

- Complete integration with tables and fields that have been added to the *BusinessModeller Trade* and *BusinessDimensions Trade* modules.

- Powerful standard functionality, such as ability to export to Excel, send by email and save in PDF format.
